

# "Just Right" Book Selection

The book is too hard when...

- many of the words are too hard to decode (*failed five finger test*).
- you don't know what the tricky words MEAN.
- your reading becomes choppy more than it is fluent.
- there are often a lot of words on the page.
- you do not have any schema/prior knowledge for the subject.
- you are *not* enjoying the book because you have to do too much word work.
- often the font is smaller than you are familiar with.
- your reading rate slows way down.
- your thinking is confused.
- you lose focus as you are reading.
